SOUTH CENTRAL POWER COMPANY
Lancaster, Ohio

SMALL GENERAL
SERVICE SCHEDULE
"SGS"

AVAILABILITY AND APPLICABILITY: This South Central Power Company (Cooperative) rate schedule is available and applicable for all single and three phase electric service for all uses not specified in Cooperative's residential rate schedules, including, but not limited to, electric service furnished to retail or wholesale businesses, manufacturing or processing establishments, hotels, mobile home or trailer camps, motels, stores, restaurants, service stations, warehouses, medical facilities, athletic facilities, professional offices, theaters, amusement establishments, business offices, schools, churches, clubs, lodges, multiple dwelling units, apartment houses, public buildings, and for all other electric service that is not exclusively for residential, home or farm use.

This schedule is applicable for three phase service whether for residential, home or farm use. This schedule may be limited to a maximum billing capacity of less than 50 kilowatts (kW).

All service under schedule "SGS" is subject to the provisions of the Cooperative's application form, the provisions of this schedule as well as the Cooperative's Policy Manual and Practices and Procedures Manual (Rules and Regulations) or subsequent revisions thereof, which Rules and Regulations are a part of this schedule as if fully set forth herein.

NET RATE PER MONTH OR PART THEREOF PER SERVICE DROP LOCATION OR ESTABLISHMENT:

The monthly billing shall be the sum of the following charges:

Consumer Charge	$ 41.00
All kilowatt hours (kWh) consumed per month	$.0260 per kWh

All billing is subject to the provisions relating to Billing Capacity, Minimum Charge, Adjustments, Rider "A", Rider "B" and the other provisions set forth herein.

TERMS OF PAYMENT: The above rates and other applicable charges hereinafter set forth are net and are due and payable on or before the date specified on the bill. If all amounts due and payable are not paid by the due date, a late fee shall become payable. If any bill is not paid within the date specified, service will be subject to disconnection as provided in Cooperative's Rules and Regulations and any reconnection of service shall be subject to the Cooperative's charge for such special service.

MONTHLY MINIMUM CHARGE PER SERVICE: The monthly minimum charge shall be not less than the highest minimum charge as determined by any of the following methods:

(a) CAPACITY: The minimum charge shall be $41.00 for the first 5 kilovolt amperes (kVA), of allocated transformer capacity, plus $1.50 for each kVA of allocated transformer capacity in excess of 5 kVA.

The applicable monthly minimum charge shall apply on a year-round, twelve consecutive month basis, or longer, as may be specified by contract. Therefore, any seasonal disconnection of service shall not avoid the applicable monthly minimum charge, except as specified under (b) below.

(b) SPECIAL INSTALLATIONS: Where installations are of unusual character as to electric usage requirements or investment, the monthly minimum charge and minimum billing capacity will be determined by the Cooperative and shall be set forth in the service application or contract with the Consumer.

ADJUSTMENTS, RIDER "A" AND RIDER "B": The rates and charges set forth in this schedule are subject to increase or decrease in conformance to the adjustments specified in Rider "A" and Rider "B".

CHARACTER OF SERVICE: Service available under this schedule will normally be either 120/240 volts, single phase, 2 or 3 wire; 240 or 480 volts, three phase, 3 or 4 wire; or 120/208 or 277/480 volts, three phase, 4 wire service. If Consumer desires a voltage that is impractical for the Cooperative to furnish, the Consumer will be required to furnish, at his expense, such transformers as are necessary to deliver such voltage.

Service will normally be supplied through a single set of service wires with all service delivered to a single meter. Where service is delivered through individual single and three phase meters, a separate bill will be rendered for each meter. If an existing Consumer arranges the Consumer's wiring, at the Consumer's cost, so that all requirements can be supplied by means of a single 3 or 4 wire service drop, extending to a single meter location, and providing that such service can be supplied from a single transformer bank and metered through a single meter, a single bill will be rendered for such service. In place of a single meter, the Cooperative reserves the right to use separate single and three phase meters in order to adequately meter fluctuating, unbalanced or unusual loads and to render separate bills for each meter.

METERING VOLTAGE: The Cooperative reserves the right to meter Consumer's requirements in the most practical manner, either at secondary or primary distribution voltage and in either case the billing kWh shall be the metered kWh.

METER READINGS: The Cooperative reserves the right to read meters other than monthly and bill on a monthly basis, using an estimated meter reading during the intervening month or months. As an alternative, the Cooperative also reserves the right to read meters bi-monthly and bill bi-monthly, in which event, the foregoing rate blocks, the applicable minimum charge, the consumer charge and the demand charge, will be multiplied by two.
Where demand metering equipment is installed the meter will be read monthly, unless the Consumer's kW demand does not exceed the rate schedule minimum, in which case, the Cooperative may read the meter bi-monthly. If the Cooperative cannot read meters, because of circumstances beyond its control, it will estimate kWh and kW usage.

AVAILABILITY OF THREE PHASE SERVICE: Normally only single phase service is available. Cooperative may, at its option, furnish three phase service, but only if such service is already available immediately adjacent to Consumer's property and if it is practical and economical to furnish three phase service. Three phase service may be furnished after giving consideration to the investment required and probable use of three phase service by Consumer and if Consumer enters into an appropriate contract that recognizes the investment involved. Any three phase line extension shall be in conformance to Cooperative's Rules and Regulations.

NEW EXTENSIONS: The Cooperative reserves the right to increase the minimum period of service, to increase the minimum charge, to charge a monthly facility charge or to charge a contribution in aid of construction where an unusual investment is required to furnish service, as compared to the estimated or probable revenue to be received.

MOTOR SPECIFICATIONS: Single phase service will not be furnished to operate individual motors in excess of 15 hp rating, except where permission is granted by Cooperative. All motors 3 hp and larger may, at Cooperative's option, be required to be equipped with reduced voltage starting equipment or other control devices so as to avoid unnecessary voltage surges and fluctuations on Cooperative's system.

Motors designed for full voltage "across the line" starting may, at Cooperative's option, be permitted to operate from Cooperative's system, providing that a study by the Cooperative indicates that the operation of such motors will not be detrimental to service furnished other Consumers. Advance permission by the Cooperative will be required for all such motor installations.

TEMPORARY SERVICE: This schedule shall apply for temporary service. However, Consumer shall pay all the charges specified in Cooperative's Rules and Regulations which provide, among other things, that the Consumer shall pay "Up and Down Costs" of establishing and disconnecting the service, less the salvage value of the materials returned to stores. A deposit may be required to cover the costs involved.

USE OF SERVICE: Service under this schedule shall not be resold or shared with others.

OTHER CHARGES FOR SPECIAL SERVICE: See Cooperative's Rules and Regulations as to charges for disconnection and reconnection of service and other special services.

REVISIONS AND AMENDMENTS: The Rules and Regulations for electric service, including this rate schedule, may be revised, amended, supplemented, or otherwise changed by the Board of Trustees from time to time, without notice. Such changes, when effective, shall have the same force as the present Rules and Regulations for electric service and rate schedules.

RECLASSIFICATION OF RATE SCHEDULE: The Cooperative shall reserve the right to reallocate services into the appropriate rate schedule based upon historical energy consumption.
